

# Powering Progress

The last year proves what's possible when a core group of elected leaders join us to fight Big Oil and Big Pharma, and deliver what our families need to thrive, like **the freedom to power our communities with clean energy; create good-paying, union jobs; and lower our healthcare costs.**

## Keeping Money In Our Pockets

**Your vote mattered. Every household in America can benefit from the Inflation Reduction Act, signed into law by President Biden one year ago this August:**

### Lower Everyday Healthcare Costs!

If you're a senior, insulin is now **capped at \$35**. Now, both Medicare beneficiaries and Medicaid recipients will have increased access to vaccines, including flu, pneumonia, COVID-19, and shingles, at no cost.

Biden's policies are saving 13 million people **an average of \$800 a year** on health care premiums.

### Cut Home Energy Costs!

Get tax credits for energy saving home upgrades – **\$2,000 for heat pumps, \$1,200 for weatherization, and more** – that reduce your taxes dollar-for-dollar.

Take advantage of rebates for energy saving appliances that reduce the cost of things like **heaters, air conditioners, and clothes dryers**. Visit [Energy.gov/save](https://www.energy.gov/save) to learn more.

# Accelerating Our Clean Energy Future and Creating Jobs in Indiana!

By generating our own renewable and reliable energy here in the U.S., we will stabilize the energy market, increase affordability, and create good-paying jobs!

The Clean Energy Plan has already supported **over 388 new projects nationally and created more than 5,657 new jobs in Indiana alone!**

Whether you live in a suburban, rural, or metropolitan area, have a college degree or not, there's a job (and training) for all kinds of job seekers.

**BETWEEN AUGUST 2022  
AND SEPTEMBER 2023:**

# 5,657

**CLEAN ENERGY JOBS HAVE BEEN  
CREATED IN INDIANA**

## Made in Indiana

The Clean Energy Plan is not just good for the environment, it is also good for the economy. It creates sustainable energy sources close to home and brings **new manufacturing jobs** to our communities.

## Investing in Infrastructure

Government funded projects to construct and repair infrastructure puts people to work and helps our communities build climate resiliency with **reliable roads, ports, bridges, and buildings.**

### Project Spotlight

Samsung and Stellantis will build a \$2.5 billion electric vehicle battery factory in **Kokomo, Indiana** that is expected to create **1,400 jobs.**

### Project Spotlight

**The City of Munster** was awarded **\$17.1 million** to transform Ridge Road into a safer, more attractive downtown business district with bike and pedestrian paths, 250 trees, and improved stormwater management.
